BULLETIN 2

1. Miskolc

"The city where nature and man created several miracles"

Miskolc is the fourth-largest city in Hungary by population and is the administrative, economic, educational and scientific centre of the region of Northern Hungary as well as the administrative seat of Borsod-Abaúj-Zemplén County. It has around 170.000 inhabitants.

The thousands of years of history, culture and natural potential of the city reveal a number of unique values, which find their way into the everyday lives of those who live in or visit Miskolc. Miskolc has charted a new course of development over the past few years: welcoming investors and visitors with its dynamically developing economy, new sectors of industry, renewing city centre and rich cultural and tourist opportunities.

The former industrial town, which has the longest main street in Europe, is situated at the foot of the picturesque Bükk Mountains, where the mountains of historic Hungary become gently rolling hills and give way to the rivers Sajó and Hernád, which connect the Great Plains to the highlands. Thus Miskolc is situated on the border between the plains and the mountains.

Miskolc is endowed with a wonderful natural environment. The border of the Bükk National Park runs through the city. This area is uniquely rich in stalactite and travertine caves and plateaus; its fauna and flora are colourful and diverse. The health-giving Cave Bath of Miskolc-Tapolca is famous all over the world. In beautiful Lillafüred, Hotel Palota and its mirror, Lake Hámor and a romantic waterfall await their guests and the world's best university sprint orienteers.

The city of Miskolc lies 180 kilometres east of Budapest. The two cities are connected with a motorway that runs directly from Budapest International Airport. Debrecen International Airport is situated 90 kms from Miskolc and there is also a direct motorway link to Miskolc.

2. University of Miskolc

The campus of the University of Miskolc is a city within the city of Miskolc, and is unique in Hungary in this respect. The constantly renewing and dynamically developing institution not only strengthens the regional role and influence of Miskolc, but directly contributes to the economic and social revitalization of the city and the region.

The university continues to enrich values through its educational and research work worthy of its 270-year history. The modernization and development of university infrastructure continues in a separate part of Miskolc, creating a modern environment for the 14.000 students and 2.000 lecturers of one of the region's most significant universities.

The high quality of education at our university is demonstrated not only by the number of professional awards received, but also by the continuously increasing number of students that choose the University of Miskolc when pursuing higher education.

The development plan of the University of Miskolc, current until 2020, covers the fields of university structure, innovation and service. The most important tasks are drafted in the spirit of the slogan "Knowledge builds universities, universities build the future".
